

“DNR Stocking Permit Request” must be made at least two months prior to the planned Stocking Event. The **DNR Permit is required for all releases that occur in flowing water.** I will need all Park Service Request information at least one month in advance of the planned stocking event.

TIC Procedures for Stocking Within the CRNRA

Contact Rodney Tumlin and provide the following information:

1. Expected number of students
2. Unit/Location for the release
3. Approximate date of the release
4. Copy of “DNR Approval Letter” for stocking trout in a waterway
5. A) If the eggs come from “Trout Lodge” in Washington State, they are certified to be disease free.

B) If they come from any other private hatchery, I will need a copy of their Disease-Free Certification.

C) If they come from a State or Federal Hatchery, I will need to know which one and I will work with the park service on a case by case basis for approval
6. If you would like a park ranger there, I will need to know so I can request one.

Once I receive this information, I will forward it to the CRNRA and they will then contact me and issue a “Park Service Permit” to stock trout. I will then forward the permit to the appropriate chapter personnel. **The Park Service Permit Must be in Possession and Onsite with the TU Representative in Charge of the Stocking!!!**

“DNR Stocking Permit Request” must be made at least two months prior to the planned Stocking Event. I will need all Park Service Request information at least one month in advance of the planned stocking event.
